## Education

### Queen's University

Bachelor (Honours) in Computer Science

Sept 2024 - May 2028

Kingston, ON

## Experience

### Software Engineer Intern

April 2026 – Present

Clover Labs

Toronto, ON

- **Joined Canada's fastest-growing startup** building an AI-powered distribution engine that grows brands on Reddit, ChatGPT, and TikTok, scaling from **\$0 to \$8M ARR in 6 months** and on track for **\$50M ARR** by end of 2026.
- Built a **stealth browser fleet** on auto-scaling EC2 Macs, **Android phone farms** run over ADB, a **GPU video generation** pipeline with ComfyUI, and **LLM citation tracking** at 30K+ prompts a day.

### Founder

July 2026 – Present

Pobi

Toronto, ON

- Founded **Pobi**, an **AI-powered prediction markets analyzer** that hit **100+ users** and **\$1.5K MRR in 31 days**.
- Built a **real-time odds engine** in TypeScript over **7 live data feeds** with failover, **score-distribution models** that price same-game parlays, and a **GPT vision + Whisper** pipeline that reads promos from screenshots and voice.

### Scholar

Feb 2026 – Present

Cansbridge Scholars

San Francisco, CA

- Selected as **1 of 17 scholars** in an 8-week entrepreneurship fellowship for **Canada's top students**, focused on venture building and high-agency leadership.
- Built and pitched an **Ikigai venture project**, mentored by **Peter Thiel Fellows** and **YC-backed founders**, gaining exposure to venture capital and early-stage startup execution.

### AI Engineer Intern

Sept 2025 – Jan 2026

Lawtonica

Kingston, ON

- Scaled an **LLM-powered assistant** in an **early-stage AI civic-tech startup** using Node.js, TypeScript, PostgreSQL, and LangChain, boosting model accuracy from **70% → 94%** through optimized pipelines.
- Designed and deployed secure **APIs** with JWT authentication and Stripe integration, delivering reliable civic-tech services that make municipal by-laws accessible to residents, newcomers, and businesses.

### Director of Technology

April 2025 – Present

Queen's Computing Students' Association

Kingston, ON

- Led a **14-member tech team** building digital products for **1,800+ students**, including COMPSA's website and digital infrastructure featuring an academic resources hub, live events calendar, internal job board, and photo gallery.
- Directed **6 major projects** accumulating **7,800+ users** to improve student life, including a Mobile App, 24/7 Room Booking Platform, E-Commerce Merch Store, Computing Clubs Hub, and AI Chatbot.

## Projects

### CASLAB Room Booking | 1,000+ users

React | Next.js | PostgreSQL | AWS

- Built and deployed a **scalable 24/7 room booking platform** for **1800+ Queen's CS students** featuring automated email confirmations, and an **admin panel**.
- Implemented **RESTful APIs** with optimized SQL queries to enable **real-time booking updates**, ensuring **low-latency** and **reliable user interactions**.

### COMPSA LLM Agent | 200+ users

Python | FastAPI | PostgreSQL | OpenAI API

- Built and deployed COMPSA AI, a retrieval-augmented LLM agent answering Queen's Computing questions by aggregating course data, policies, and community resources into a centralized knowledge system.
- Engineered a FastAPI + PostgreSQL/pgvector RAG pipeline with OpenAI embeddings, semantic search, and automated PDF/website ingestion, enabling grounded 24/7 responses for Queen's Computing students.

## Technical Skills

**Languages:** Python, TypeScript, JavaScript, HTML, CSS, SQL

**Frameworks & Tools:** React, Next.js, React Native, Tailwind CSS, Node.js, FastAPI, Drizzle ORM, PostgreSQL, Supabase, pgvector, Docker, AWS, Terraform, GitHub Actions, Vitest, LangChain, OpenAI & Anthropic APIs
